

## School Performance Fact Sheet

PhlebotomyU, formerly known as Family Health Services, is required by the California Education Code to make available a copy of the Center's School Performance Fact Sheet to each prospective student. A copy of this document is on file with California Bureau for Private Postsecondary Education.

The charts below illustrate the Center's performance over two years including 2016 through 2017 in phlebotomy training program. The performance categories illustrated include:

1. **Course Completion Rate** which includes the number of students enrolled in the course and the number of students who successfully complete the course.
2. **Placement Rate** which includes the number of students that successfully completed the course and the number of students subsequently employed.
3. **National Exam Passage Rates** which includes the number of students that sat for the national phlebotomy exam and the number of students who passed.
4. **Salary and Wage Information** which includes employment and wage data reported by students employed during 2016 and 2017.

Course completion rates were calculated from student data on file at the Center. The Center is required to keep such data for a minimum time period of 5 years. Should a reader of this document care to review this data, it can be made available upon request with student personnel data deleted.

Phlebotomy as an occupation is closely related to other occupations in the field of clinical laboratory science. Such occupations include Medical Laboratory Technician and Medical Laboratory Assistant. These are positions in the field of Clinical Laboratory medicine to which a student could be placed based on education and training provided in this course.

The US Department of Labor Occupational Handbook 2010-2011 gives the most current data available on job prospects for graduates of phlebotomy programs whose training may qualify for placement in other closely related occupations as discussed above. To review this information the reader is referred to the US Department of Labor's website. Search for "Occupational handbook" and scroll down the alphabetical listing to find Medical Laboratory Technicians or Medical Laboratory Technicians.
